

ELEVATE OUTDOOR LIVING

WITH RESIN-BOUND STONE

Through the natural character of stone, outdoor spaces gain texture, depth and individuality.

STONIQUE

STONIQUE

WHERE NATURE MEETS REFINED DESIGN.

Stonique offers a distinctive way to finish outdoor spaces, showcasing the natural texture of coloured stone granules in a continuous, decorative surface. With an exceptionally extensive colour palette, Stonique opens up a world of design possibilities, allowing for a remarkable variety of colour combinations and visual effects to complement the surrounding architecture and landscape. From residential outdoor areas and swimming pool surrounds to hospitality and commercial spaces, Stonique creates distinctive surfaces that combine the natural character of stone with refined design.

UV-resistant

UV-resistant components help maintain Stonique's colour and appearance, even under prolonged exposure to sunlight.

Naturally rounded Rhine River stone

The stone granules originate from the Rhine River in Germany, where centuries of natural erosion have shaped their characteristic rounded form. Carefully selected, dried and graded by size, these granules provide the distinctive natural texture that defines Stonique.

Stone Granulometry

Stonique is available in three grain sizes: 1-2 mm, 2-3 mm and 3-4 mm. Each grain size creates a different surface appearance, offering further flexibility in achieving the desired finish.

1-2mm 2-3mm 3-4mm

Self-cleaning surface

Stonique's open structure allows rainwater to drain freely through its surface, creating a natural self-cleaning effect as rainfall washes away loose dirt and debris.

High resistance to cracking

The polyurethane binder within the Stonique system provides the flexibility to accommodate expansion and contraction caused by intense temperature fluctuations, helping to prevent cracking and maintain the integrity of the surface.

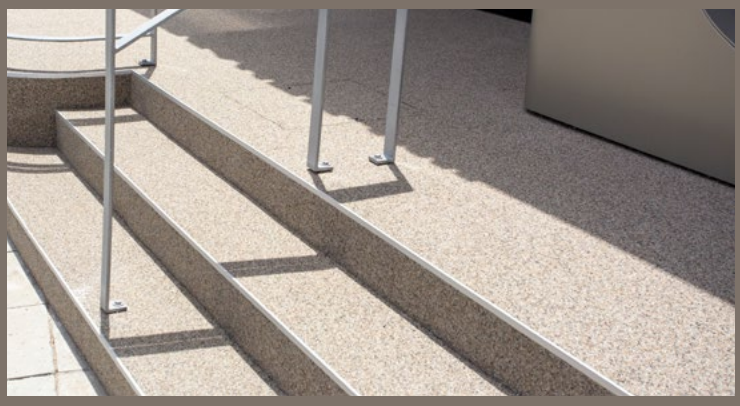

Slip safety

The textured stone granules provide a slip-resistant surface, contributing to safer and more confident movement across outdoor areas.

Custom colour combinations

The stone granules can be coloured to match specific colour requirements and combined in different ways to create distinctive patterns and decorative effects, offering exceptional freedom in the design of outdoor surfaces.

FOR SPACES THAT DESERVE MORE.

MORE THAN A SURFACE. **A STATEMENT.**

STONIQUE IS AN IDEAL FLOORING SOLUTION FOR:

- Terraces and balconies
- Swimming pool surrounds
- Patios and outdoor living areas
- Garden paths & landscaped areas
