

NOBLE

Noble is a modular floor, inspired by the long tradition of classic parquet.

Noble Oak Bronx - 7806017

Noble is a design that reinterprets a classic modular technique of the 1950s. With brushing and hardwax oil finish it creates a look that changes according to your position and perspective as the light falls in the room. The result is an exciting dynamic between the floor and its surroundings, for an effect that is both timeless and on trend. The extension is a tribute to classic floor constructions with elegant and more contemporary colour and brushing. Each squared lamella is applied by hand to Tarkett's engineered, layered construction. Alternating grain directions, small variations and designed misalignments give every board a flare of uniqueness and exclusivity typical of all handcrafted work. We call it "Perfect imperfection".
