# Swingseat Tango

**8053217**  6mm Stainless Chain  
Black – Options

The Tango swing seat is a patented, two-seater configuration designed for children aged 1-5 and their older supervisors. It can be attached to most swing frames that meet the EN 1176 technical requirements. The seat promotes interaction and communication between generations by allowing adults or older children to swing face-to-face with the toddler. It ensures maximum comfort and safety for children of different abilities, with a cradle seat providing back support and secure positioning for toddlers and children with limited mobility. The seat shackles also double as handholds for added support. The components are made from durable materials, including plastic-coated, stainless, and galvanized steel shackles, as well as a plastic seat.
