## SPORTEC® fusion classic

### PREFABRICATED FUSION OF ELASTIC AND FINISHING LAYERS

**SPORTEC® fusion classic** consists of a technically advanced elastic layer made from **SPORTEC® standard** material and a tried and tested **SPORTEC® UNI classic** floor covering. This combination prevents damage to joints and other injuries and is therefore particularly recommended for indoor sports facilities in schools, leisure centres and multi-purpose buildings. The elastic layer and the top layer are delivered as pre-fabricated double-layer rolls. Less time is required during installation, because only one roll needs to be glued onto the substrate.

## SPORTEC® style

THE IDEAL WEIGHTLIFTING SOLUTION TO PROTECT AGAINST SHOCK AND NOISE

**SPORTEC® style** protection slabs made from recycled rubber granules are available with **SPORTEC® color 15**, **SPORTEC® purcolor** or **SPORTEC® UNI versa** (for outdoor use) finishes. **SPORTEC® style** protects subfloors from damage by falling heavy objects, e.g. in weightlifting areas of fitness centres or training facilities. Even if not themselves damaged by falling weights, conventional floor surfaces transmit impact shock which often results in serious damage to the concrete subfloor. **SPORTEC® style** avoids this deep-impact damage while providing outstanding sound deadening as well.

### Technical Data

<b>Material</b>	Polyurethane-bonded recycling tyre rubber granules, different surfaces
<b>Thickness</b>	30 mm (± 2 mm)
<b>Colours</b>	<b>SPORTEC® color 15 / purcolor / UNI versa</b>
<b>Dimensions</b>	500 x 500 mm or 1,000 x 500 mm
<b>Area weight</b>	approx. 27 kg/m <sup>2</sup>
<b>Tensile strength</b>	min. 0.7 N/mm <sup>2</sup> (EN ISO 1798)
<b>Elongation at break</b>	min. 70% (EN ISO 1798)
<b>Temperature resistance</b>	- 30°C to + 80 °C

**SPORTEC® UNI versa**  
(for outdoor areas)

**SPORTEC® purcolor**

**SPORTEC® color 15**  
(also available in color 0)

### Properties

- highly compressed material absorbs shocks and reduces rebound
- protection of subfloor from damage through integrated fibre mesh
- sound reduction of 26 dB
- anti-slip properties R9/R10 + DS-label
- easy installation and exchange thanks to pre-installed connector pins

## SPORTEC® style edge and corner profiles

ACCESSORIES FOR MORE SAFETY

**SPORTEC® style Edge and Corner Profiles** are the perfect complement to our **SPORTEC® style** tiles. With its beveled edges, they provide a smooth and safe transition zone, reducing the risk of tripping when entering or leaving heavy weight areas.

**SPORTEC® style edge and corner profiles** have to be glued onto the substrate, as well as to the joints between the profiles, using a 1-component PUR adhesive. We recommend Ottocoll P83 and Ottocoll M 500 which are available in black and red.

## ENVIRONMENTAL MANAGEMENT AT KRAIBURG RELASTEC

### FROM OLD TYRES TO TOP-QUALITY FINISHED PRODUCTS

**KRAIBURG Relastec** is one of the best known global companies that specialise in the production of technical rubber materials from old tyres. As a recycling specialist, we have for many years been committed to the protection of the environment. Every year, we process and recycle about 85,000 tons of old tyres, closed-cell rubber and rubber production scrap. From these raw materials, we produce high-quality granules based on our internally developed formulations. These granules make up more than 90 % of the material used in our finished products. All our products are 100 % recyclable without loss of quality.

At **KRAIBURG Relastec**, protecting the environment is a strategic priority. We are convinced that sustainable growth is only achievable, if we meet our responsibilities towards the environment. **KRAIBURG Relastec** has therefore adopted a very simple policy: Protecting the environment is part and parcel of what we do every day!

Our “pro environment” logo stands not only for 40 years of sustainable business practices that protect resources, but emphasises our commitment to product quality and continuous improvement for the protection of the environment beyond the statutory regulations.

-  We turn waste rubber materials into new raw materials and products, making a valuable contribution to waste reduction and the protection of the environment.
-  We invest in innovative and environmentally friendly production methods and technologies.
-  Our products are subject to continuous quality testing and further development, whereby environmental concerns are given priority. We are always on the lookout for even more environmentally friendly alternatives that enable us to further reduce emissions and protect resources.
-  All employees of KRAIBURG Relastec undertake to implement sustainable practices in their daily work and to protect the environment wherever they can.
-  We expect the same from our suppliers and constantly monitor their performance.
